The task provided in the project is the migration of banking data of all the small bank acquired by J. D. Monster Bank. To accomplish this task, the CEO of J.D. Monster Bank, Mr. Mel Faesance has hired a subject matter expert I. Noitall. Mr. Noitall has an idea to create a virtual team across the globe. This way, the project would be able to run 24-7 because the teams are in 8 different time zones.

The team consists of expert system analysts, programmers, DBAs and IT assistants. Their job is to migrate thousands of customer bank accounts securely from the host main frame system to the J.D. Monster real time cloud based banking networking system. However, at the local bank level, it is a client server configuration utilizing current Microsoft Server and Windows software. The migration is to be done within the fiscal year. The budget for the project has been estimated at $350,000 per migration.
